

"B" Free Standing

**Tank Kit Free Standing incl Guage**

Free Standing tank designed to provide a reservoir of air at a high delivery rate in a portable format.  
Usefull in a workshop e.g. to re-bead a tyre, power an air-duster tool or air-jack or on the back of a bakkie. Includes an 8 Bar Quality Stainless steel guage, a Tyre valve filler point and a quickcoupler female.

"C" ARB Full Air

**Tank Kit ARB diff locker add-in, incl Guage**

Expands the reservoir of air available from the ARB Diff locker and uses the automatic tank filling system provided by the diff locker kit. ARB uses a pressure switch that switches the compressor on around 5.8 bars and off again after the tank fills to around 7.2 Bar. The non-return (one-way) valve at the ARB Tank-end of the yellow pipe stops the a high pressure in this tank (e.g. when filled via the Tyre valve) from entering the ARB diff locker tank. Includes an 8 Bar quality Stainless steel guage and a quickcoupler female. Can be used to re-bead a tyre

"D" Full Air

**Tank Kit for Full Air Systems**

Keeps a reservoir of air so that the compressor only switches on occasionally, using a pressure switch on at 5.8 bars and off again after the tank fills to around 7.2 Bar. Includes a non return valve on the compressor side and a hose connection (quickcoupler female) and a tyre valve emergency filler point. Can be used to re-bead a tyre

"E" Economy

**Tank Kit Economy**

Tyre (Scrader) valve filler / takeoff point, otherwise blanks on all ports.

**1.9 Litre tank kits**  
**Based on V91005 (ViAir)**
